## DAY 1

26 March 2017

**Kigali - Volcanoes National Park**

Note that arrival should be before 1pm, for those arriving on later flights, please book a night in Kigali beforehand. A 'true island in the sky', the Volcanoes National Park is home to some of the worlds few remaining Mountain Gorilla, which were first studied here in 1959 by George Schaller, and through the 1960's by Dian Fossey and her colleagues.

In the afternoon you'll have a briefing where Scott will take you through the next few days and ensure you are properly prepared for your encounters with the gorillas!

DAY 2 - 3

27 - 28 March 2017

#### **Volcanoes National Park**

Enjoy 2 days of gorilla tracking. The gorillas we are allowed to track belong to either one of ten habituated family groups. An early breakfast and you're off to the park headquarters at Kinigi to register and be allocated your gorilla family for today. Once this is done, you set out by vehicle to the start of on your gorilla safari. The gorillas are by no means tame, and are completely wild animals. However, experienced guides will accompany you on your gorilla tracking, many of whom have been involved in the habituation process themselves. The guides will use their knowledge of the gorillas' habits and information from the previous day to locate the group's whereabouts.

Scott will guide you through how to get the best out of your photographs and in the evenings, go through them with you so you can improve your skills in following days.
