DAY 2 - 3

3 - 4 April 2017

Bwindi Impenetrable National Park

Two days of tracking! The Mountain Gorillas in Bwindi are part of a worldwide population of just 820. The gorillas you can track belong to one of three habituated family groups. For up to five years each, these groups have undergone an extremely delicate process that has gradually brought them to tolerate the presence of humans for a brief period every day and allowed a few privileged visitors to interact with them. The gorillas are by no means tame, and are completely wild. Experienced guides will accompany you, many of whom have been involved in the habituation process themselves. The guides will use their knowledge of the gorillas' habits and information from the previous day to locate the group's whereabouts. Because of this, the time taken to track the gorillas varies enormously, from as little as half an hour to 9 hours.
